

Pure Comfort
Assortment B2B

professional

About brand

TM Ruta Professional is a high-quality paper sanitary products, which is designed specifically for use in the direction of HoReCa. PJSC "VGP" is one of the largest manufacturers of paper products in Ukraine. Priority direction of our company is to provide working for HoReCa clients with high-quality products, which as much as possible correspond to the requirements of the end users. The positive dynamics of the paper products market of B2B channel makes us actively develop and expand our range of Professional brand Ruta. Our advantages are our many years of experience with a focus on long-term relationships and our responsibility to our partners for the high quality of our products.

VOLYN GLOBAL PAPER

Advantages of TM "Ruta" toilet paper of the Professional line

- Selected natural raw materials of a particular formulation: 60% softwood / 40% hardwood, allows to achieve a special softness and strength
- Companies with lower prices use universal raw materials for all their products
- Raw materials from the best global manufacturer only = consistently high quality
- Special patented embossing = softness and lushness
- Soft top is a unique technology used at VGP PJSC in the production of roll products. This technology makes it possible to achieve greater softness without losing the strength of the product

Toilet Paper “Ruta” Professional 2-ply 24 rolls

Characteristics	Value

Advantages of TM "Ruta" napkins of the Professional line

- The special composition of the raw material for napkins (50/50 softwood/hardwood pulp for strength and softness). Companies with lower prices use universal raw materials for all their products.
- Chlorine-free
- Different embossing for different products:
 - All-over - for 1-ply napkins = soft and fluffy;
 - Border embossing - for 2- to 3-ply napkins. It has two functions - decorative and a bonding effect. The special border embossing technology prevents the plies of our napkins from being separated, unlike the cheaper varieties.
- The density of napkins allows you to lay the table according to any plan. The napkins retain their shape for a long time.
- Automatic product wrapping.
- Unique formats: 200l, 400l, 1/8 fold.

Advantages of TM "Ruta" **facial tissues** of the Professional line

- ✓ **Special raw material composition** with the addition of up to 10% of eucalyptus raw material = special softness. Lower priced market players use a universal raw material for all their products
- ✓ The **calendering technology** softens the raw tissue material additionally and provides it with a special velvet-like softness
- ✓ Raw materials from the best global manufacturer only = consistently high quality. In contrast to cheaper manufacturers, the quality does not vary with each delivery. We will not use cheaper raw materials at the expense of the quality of Ruta products.

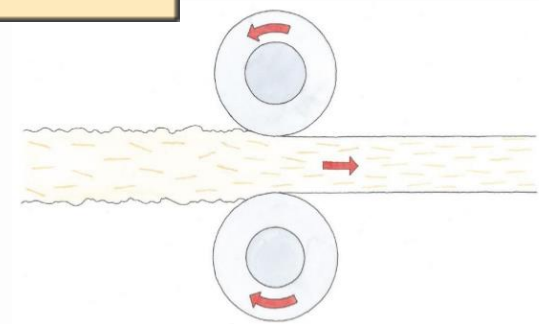

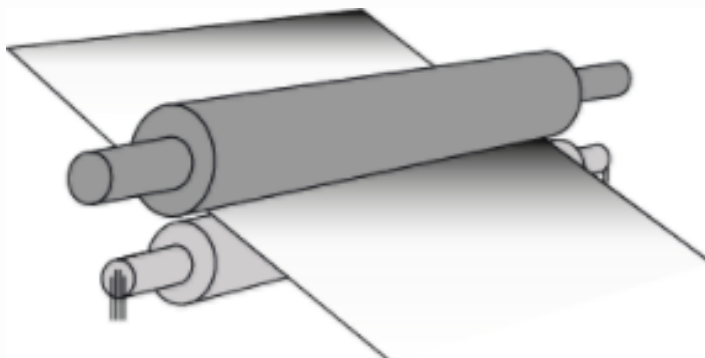

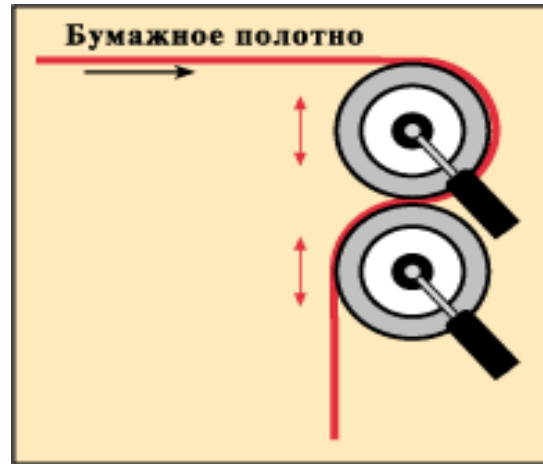

For facial tissues:

- ✓ The special Top-to-flat technology embossing allows the tissue ply to bond securely.
- ✓ The special folding of the packaging allows one tissue to be removed at a time without tearing.
- ✓ A special flap prevents dust and bacteria from getting onto the tissue (which is especially important for wipes that come into contact with the skin of the face).
- ✓ A variety of packaging formats for facial tissues (cube, block, foil).

* CALENDERING

Paper calendering is the finishing of paper using calenders to adjust thickness and smoothness, giving increased smoothness and gloss.
